PROFILE

Detail-oriented Computer Science graduate with hands-on experience in data annotation, data labeling, and AI training workflows. Proficient in annotating text, code, and multilingual content for LLM and ML model training. Strong background in evaluating AI-generated responses for quality, accuracy, and alignment with labeling guidelines. Experienced in Python-based data pipelines and familiar with NLP and deep learning fundamentals.

EDUCATION

Shri Jayachamarajendra College of Engineering, Mysore 2022 – 2026
B.E. in Computer Science and Engineering; CGPA: 8.47
Masters PU College 2020 – 2022
Pre-University Education; Percentage: 94.66%; KCET Rank: 3271

PROFESSIONAL EXPERIENCE

Data Annotator – Innodata Oct 2025 – Dec 2025

- Annotated and labeled diverse text, code, and image datasets for machine learning model training and validation; maintained high accuracy and throughput across annotation batches.
- Performed entity recognition, sentiment tagging, intent classification, and instruction-response labeling for LLM fine-tuning datasets in English and Kannada.
- Conducted quality checks on annotated data to ensure consistency and correctness; collaborated with AI teams to refine annotation guidelines and improve data quality standards.

Data Labeling Specialist – Upwork (Freelance) Jul 2025 – Sep 2025

- Completed multiple freelance data labeling contracts for international clients, annotating text, audio transcripts, and image datasets for NLP and computer vision model training.
- Applied labeling schemas including named entity recognition (NER), part-of-speech tagging, bounding box, and image segmentation based on client-provided annotation guidelines.
- Maintained high accuracy rates and fast turnaround; earned repeat project assignments across diverse domains including healthcare and e-commerce.

Data Analyst Intern – Boyle Lifesciences, Bangalore Sep 2025 – Oct 2025

- Cleaned, preprocessed, and organized large-scale healthcare datasets using Python, SQL, and Excel; improved data quality by 25% enabling reliable clinical insights.
- Performed EDA and automated reporting, reducing manual work by 30%; built Python scripts for efficient data extraction and pipeline management.

PROJECTS

SmartAgri-AI | AI-Powered Precision Farming System 2025

- Built and curated training datasets for CNN and LSTM models for crop disease detection and yield forecasting; applied data preprocessing and feature engineering pipelines in Python.
- Designed annotation workflows for agricultural image datasets; validated model outputs against ground-truth labels to measure accuracy and identify labeling inconsistencies.
- Deployed full-stack system with FastAPI backend, MongoDB storage, and React frontend; integrated LangGraph multi-agent chatbot via Groq API.

Plant Disease & Knowledge Assistant | Deep Learning, CNN, RAG 2025

- Curated and labeled a dataset of 15+ plant disease classes; trained CNN model achieving 92% accuracy by ensuring clean, balanced, and consistently annotated training data.
- Built RAG-based Q&A system for plant knowledge retrieval from research PDFs; optimized inference pipeline for sub-second predictions with image preprocessing.

TECHNICAL SKILLS

Languages: Python, SQL, C

Data Annotation: Text Annotation, Image Labeling, Bounding Box, NER, Sentiment Tagging, Intent Classification, Instruction-Response Labeling, LLM Output Evaluation

Annotation Tools: Label Studio, CVAT, Labelbox, Prodigy, Scale AI, Amazon Mechanical Turk

Quality Assurance: Inter-Annotator Agreement, QA Review, Defect Reporting, Annotation Guideline Development

ML & AI Basics: scikit-learn, TensorFlow, CNN, LSTM, NLP, RAG Pipelines, LLM Fine-tuning Concepts

SOFT SKILLS & LANGUAGES

Soft Skills: Attention to Detail, Problem Solving, Communication, Teamwork, Critical Thinking, Analytical Skills

Languages: English (Professional), Kannada (Native), Hindi
